

## Request

I would like to see the criteria Wigan Council uses for speed camera traps, in particular mobile speed traps. I spoke to a policeman the other day on the new bypass in Wigan (and he was conducting speed checks) and he stated Wigan Council pick the routes.

I would like to see the locations and criteria to pick as the bypass is not residential and sparsely populated so it seems to be positioned there just as a revenue stream.

Can I also see the revenue per area of speed traps in the wigan borough.

Map and moreover, the logic for these speed check areas being picked.  
Correspondence to why these have been picked.

## Response

All the information we hold on speed safety cameras is on our website at the link below;
