

I am writing to request information under the Freedom of Information Act 2000 regarding high-rise residential buildings (HRBs) within your jurisdiction. Specifically, I seek the following details:

1. The total number of residential buildings that are 18 meters or taller, or have at least seven storeys, and are currently occupied.

There are a total of 7 High Rise Buildings (HRBs) which are more than 18M in height.

2. Building Safety Case Reports:

- The number of these HRBs for which a Building Safety Case Report has been prepared and submitted to the Building Safety Regulator (BSR).
- A copy of the Building Safety Case Report(s) prepared for submission to the BSR.

All 7 buildings have been registered with the BSR

The BSC is a live process which is now available to the BSR.

As you are aware, under the Building Safety Act 2022, principal accountable persons are required to register existing occupied high-rise residential buildings with the BSR by 30 September 2023.

We are aware of the BSA and FSA and the regulator requirements

Additionally, the preparation of Building Safety Case Reports is mandated, with the BSR beginning to call in buildings for assessment and issuing Building Assessment Certificates from April 2024.

As above we have registered all our HRBs and prepared our BSC for each building.
