

Request

Please could I request the following information under the Freedom of Information Act.

For each of the last 5 calendar years the number of reports your local authority have received of the following maintenance issues in maintained schools:

- a. Leaks and other plumbing issues
- a. Heating issues
- b. Loose paving or masonry

Response

This is information we do not receive and do not hold. The local authority is only responsible for planned maintenance projects at community schools.

All day-to-day maintenance on schools is the responsibility and is carried out by the schools directly.
