By 2026, we want people to have good access to an attractive transport system, which provides choice for jobs, goods and services, and balances the needs of sustainable residential communities with strategic business networks

- > Sustainability to deliver economic, environmental and social outcomes
- > Equitable access between communities, businesses, services and goods
- Diversity and adaptability for choice and resilience
- Attractiveness to encourage modal shift

	Attractiveness to	enedarage modat sim		A C Drave	District District True	F	C T	Commence Broom
	STRATEGIC IMPORTANCE OF RAIL	BETTER BUSES	More Cycling, More Safely, More Often	A STEP IN THE RIGHT DIRECTION FOR WALKING	PARKING - RIGHT TIME, RIGHT PLACE, RIGHT PRICE	EFFECTIVE & EFFICIENT FREIGHT	SMARTER TRAVEL - TACKLING CONGESTION	CONNECTING PEOPLE TO OPPORTUNITIES
Long Term Outcomes	 Improve quality, image and choice for rail passengers Better stations, better trains, and improved services Improve integration and connectivity with other modes Support flexible / smart ticketing Expand the range of rail services and destinations Improve the passenger experience Influence decisions on investment and operation 	 Make bus travel more attractive, reliable and competitive Improve punctuality and reliability Ensure value for money Improve service frequencies, operating hours and choice of routes Improve interchange between bus services and other modes Improve door to door connections and interchange Support smart ticketing 	 Generate a new culture of cycle commuting Create an environment where cycling is regarded as safe and convenient Maintain and develop and inclusive and 'fit for purpose' network Improve road safety and personal security Increase and sustain cycle use by expanding the use of cycles for leisure Promote cycling and equip users with skills and information 	 Encourage people to think about their short, local journeys on foot Re-address the balance between perceived time and convenience savings of the car Walking built into everyday routines Healthier lifestyles, improved air quality and reduced local congestion Maintain and develop an inclusive and well-connected PRoW network Promote walking trips for health and leisure 	 Provide the right balance of parking provision (cycle, motorcycle, car, and HGV) Work with developers / major employers on sustainable travel options to reduce the impact of parking Ensure parking policy promotes a shift to sustainable transport modes Parking supports and strengthens the local economy Ensure a balance of parking in town centres i 	 Improve the efficiency of freight to help grow the economy Reduce the impact of road freight on local communities Develop an effective and appropriate freight network (road, rail or water) Support improvements in vehicle technology to reduce environmental impacts Better loading facilities for quicker, flexible deliveries 	 Keep people / services moving to support the economic prosperity of the Borough People think about their journeys and plan sustainable transport trips where possible Make the most of any funding opportunities by demonstrating Value for Money and the sustainability of projects Balance demands on the network through effective network management 	 Walking and cycling are embedded within our physical landscape Public transport connects residential communities to key destinations Strategic highway connections provide direct access for business and provide opportunities for enhanced sustainable transport corridors Efficient transport connections to access jobs, goods & services Better service integration between modes of travel Ensure people can get to where they want to go
