

# How is Climate Change Linked to Air Pollution?

## Task 1: Think, Pair, Share

In pairs, visit the Wigan Borough Air Quality Hub and explore the interactive map, to find the air quality monitors located around the borough, and use the live data feeds to answer the following questions:

- Identify patterns in the data.
- Suggest the sources of this pollution.
- Explain why certain areas have worse data than others.

## Task 2: Air Pollution 101

Watch the video on screen and fill out the following table with the information it gives you:

Type of human made air pollution	State one cause of this type of pollution	State one effect of this type of pollution
1:		
2:		
3:		

### Task 3: Tweeting Air Pollution

Write a two-sentence tweet which highlights one of the effects of air pollution with a change which would help to address this.

Consider...

- How individual people could change their behaviour.
- What governments and large organisations can do to reduce the effects of air pollution.
